

Sula – Providing Systems Engineering Capability to Industry

Sula is a leading independent systems engineering consultancy providing systems engineering capability into the defence and aerospace industries. Sula has a strong reputation for innovation, judgement and value for money.

Sula deploys small teams of highly capable and experienced engineers that will make a disproportionate difference to your programme.

When to Use Sula

New Project: Sula will enable you to provide rapid mobilisation when a new contract has been won pending recruitment of organic resource.

Approaching Important Milestone: Sula will shore up your systems engineering capability in a project to meet a key project milestone.

Resource Re-allocation: existing projects can suffer when a new contract is won and the business transfers key systems engineering resource to the new project – Sula can enable you to maintain momentum on the ongoing projects.

Bids: Sula will provide systems engineering resource to prevent major bids from disrupting ongoing projects.

Subject Matter Experts: Sula can provide subject matter experts that are unavailable within your organisation.

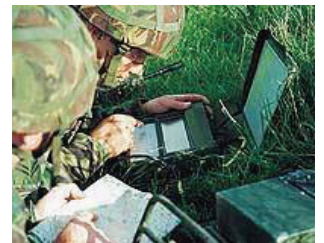

Independent Review and Assurance: Sula will undertake independent peer design review and technical assurance, enabling new insights along with a demonstration to your customer that you have sought independence.

Sula's Capabilities

- › Systems Engineering and Integration
- › Systems Engineering Process Development
- › System Concepting
- › System Trades
- › Independent Systems Analysis
- › Requirement Definition & Analysis: Functional Modelling, Requirements Engineering, System Specification
- › Verification & Validation, Design Certification
- › Technology & Systems Integration Assurance and Maturity Assessment
- › Modelling and Simulation
- › Safety Engineering
- › Capability Integration

Sula's Domain Knowledge

- › Armoured Vehicles
- › Network-Enabled Battlespace Integration
- › Radar Systems – Naval and Airborne
- › Complex Weapons
- › Naval Combat Systems
- › Air Defence and Surveillance
- › Ballistic Missile Defence
- › Aircraft Fuel & Landing Gear Systems
- › MOD's Defence Acquisition system
- › Defence & Aerospace Prime Contractorship
